

City of Lafayette  
Lafayette Library and Learning Center Project Bulletin

January 25, 2008

**Construction Activities:** Project construction passed its 200<sup>th</sup> day. Rain continues to affect the construction, but the primary work was to begin the stripping of the concrete forms on the First Level and the formwork and decking of the Second Level. Now that the Second Level is underway, the StructureCraft team was here from Vancouver for a coordination meeting for the timber and roof system.
