**Construction Activities:** The major exterior work continued to be the roof and the windows. Rain slowed the installation of the roof panels, but good weather has allowed progress to be made. The installation of windows is underway. Work on the interior includes sheetrock and finer details on the various systems – electrical, fire safety, HVAC, and plumbing.

Roof panels

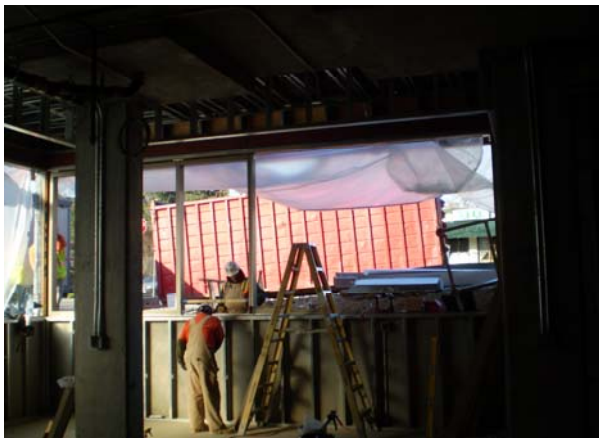

Installing clerestory window over the main Library space

Finished window frames

Windows on Staff Work Space east wall

Installing windows in the Bookstore

Community Hall Gallery

Media screen space in the Lobby

Kana Tanaka's art glass disk for Children's Activity Deck trellis
