

City of Lafayette
Lafayette Library and Learning Center Project Bulletin

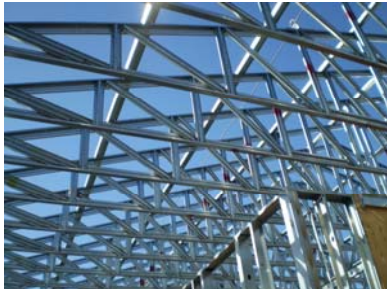

October 17, 2008

Construction Activities: On the interior, work continued on framing walls and installing utility connections. Framing for the clerestory windows around the main Library space continued. The roof structure over the Staff Wing was constructed. On the exterior, with the first rain of the season, the focus has been to secure the structure for winter. EBMUD installed the water connections on First Street and Golden Gate Way.

Framing of walls and roof in the Staff Wing

Framing of Community Hall wall

Looking east over the solar panel structure

State Library Inspection: Curtis Purnell, Bond Act Fiscal Officer, and Bessie Condos, Lafayette's grant manager, from the California State Library made their midpoint inspection today. They did not find any issues, and were very impressed with the project construction. As Ms. Condos said: "It's great seeing a library that's not a box."
