

City of Lafayette  
Lafayette Library and Learning Center Project Bulletin

November 17, 2008

**Construction Activities:** Most of the work has been centered on the roofs and making the buildings secure from winter weather. The roofs and window and door openings have been covered. The yellow exterior wall board is being installed. The skylights have been framed and the glass is lowered into the frames with a crane.

Roof of the Staff Wing  
before the weatherproofing was installed

Cutting the wall board  
around one of the Big Dipper windows
